Detailed prerequisite list available upon request from your OpenClassrooms representative

# An experienced mentor by your side

Benefit from weekly, one-on-one sessions (~45 min) with an expert who will provide you with guidance and feedback on your exercises.

« The mentoring session should be something you look forward to. I clear things up with students, curate content for them, guide them on how to organize their time, teach them to do their own research... and I share my experience from years in the field ».

Sara ROSENBERG, OpenClassrooms mentor

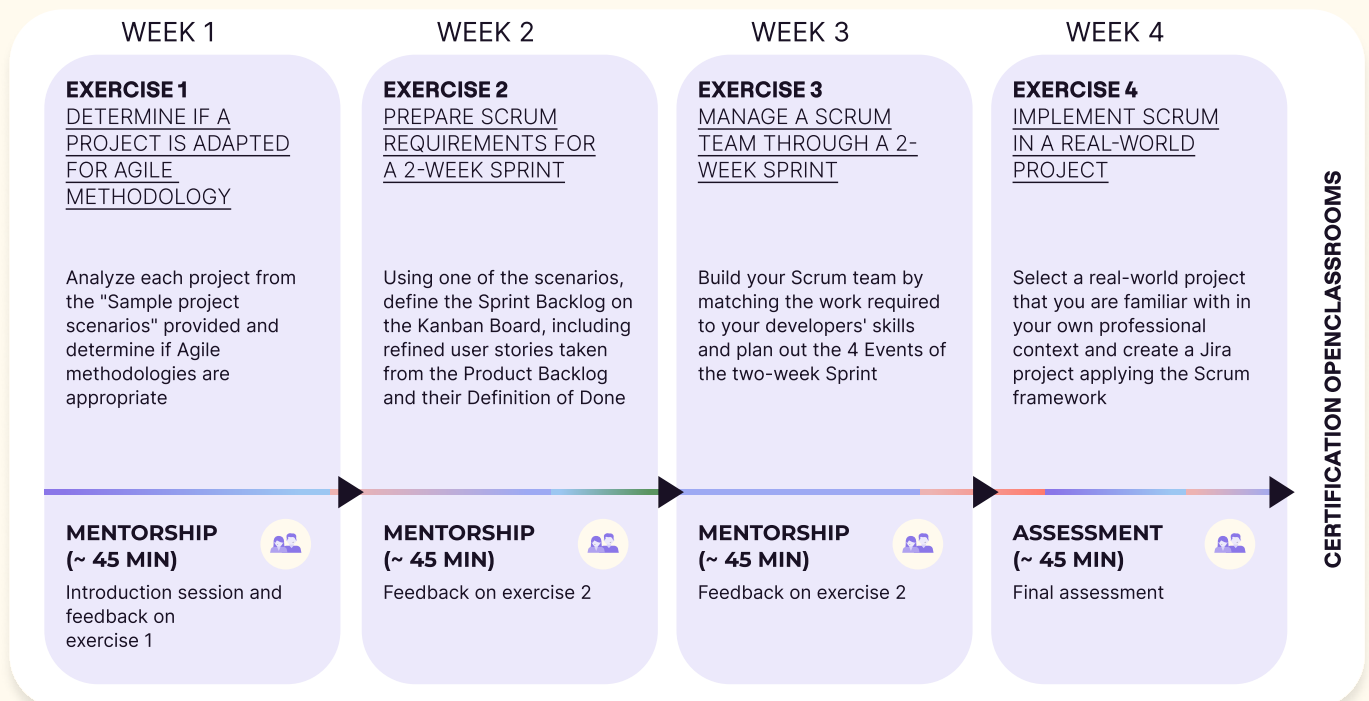

## Agile Project Management

### Mission :

Apply Agile principles to a relevant project and prioritize team efforts according to value within a dedicated framework \*

\*you can either work on a problem that affects you personally or which is linked to the company you are working with.
